# League Table

## Get All Tables for a League Season

**GET** `https://api.football-data-api.com/league-tables?key=YOURKEY&season_id=X`

Sample Response (Access the URL below)

`https://api.football-data-api.com/league-tables?key=example&season_id=2012`

Returns the data of each team as a JSON array.  
Add &include=stats to the request to get the stats of each team !

### Query Parameters

| Name | Type | Description |
|------|------|-------------|
|------|------|-------------|

|            |         |                                                                                                                                                                                                                                                |
|------------|---------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| max_time   | integer | UNIX Timestamp. Set this number if you would like the API to return the stats of the league and the teams up to a certain time. For example, if I enter &max_time=1537984169, then the API will respond with stats as of September 26th, 2019. |
| key*       | string  | Your API Key                                                                                                                                                                                                                                   |
| season_id* | integer | ID of the league season that you would like to retrieve.                                                                                                                                                                                       |

200 Successfully retrieved all leagues.

Queries and Parameters

 You can test this API call by using the key "example" and loading the league tables from the English Premier League 2018/2019 season (ID: 1625).

| Variable Name | Description |
|---------------|-------------|
|---------------|-------------|

|                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
|----------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| league_table                                       | If the league only has a single round with no play-off matches (ie Premier League), the League Table is stored here.<br>Returns NULL if the league is a Cup format.                                                                                                                                                                                                                                                                                                                                                                                                       |
| all_matches_table_overall                          | Full table across all matches played during the season. For example, if this is a cup competition, then we will generate a table with all teams across all the matches that they've played.<br>This is not necessarily the league table.                                                                                                                                                                                                                                                                                                                                  |
| all_matches_table_home /<br>all_matches_table_away | Full table only taking into account either Home matches or Away matches.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| specific_tables                                    | Array. Contains tables for each round of a season. Many leagues in the world have multiple rounds with league tables during 1 season.<br><br>ie Uruguay Primera Division:<br>Apertura - Table.<br>Intermediate Round - Group Tables.<br>Clausura - Table.<br>Final Play-Offs - NULL (no table).<br><br>ie Championship :<br>Regular Season - Table.<br>Play-Offs - NULL (no table).<br>ie UEFA Champions League.<br>Qualification Matches - NULL (no table).<br>Group Round - Table for each group.<br>8th Finals - NULL (no table).<br>Quarter Finals - NULL (no table). |
