League List

Get Leagues

GET <https://api.football-data-api.com/league-list?key=YOURKEY>

Sample Response (Access the URL below)

<https://api.football-data-api.com/league-list?key=example>

Returns a JSON array of all leagues available in the API Database. Each season of a competition gives a unique ID.

Query Parameters

Name	Type	Description
chosen_leagues_only	string	If set to "true", the list will only return leagues that have been chosen by the user. ie ?

		key=xxxx&chosen_leagues_only=true
key*	string	Your API Key
country	integer	ISO number of the country. Will filter the response to leagues from the selected country. Remove any leading 0s. If there are no data returned, it means there are no leagues we support in that country/nation.

200 Successfully retrieved all leagues.
